- **Set weight:** 11 kg

Power

- **Mains power:** AC 220 - 240 V +/- 10%

Product highlights

Digital Studio Picture Control

Smart Picture

Smart Picture provides the optimum picture settings for colour, brightness, saturation, contrast, sharpness, etc. to enhance your overall viewing experience at all times.

NTSC Playback

2 Tuners

Teletext

Teletext is a communication system transmitted by most broadcasters in Europe, which contains a rich variety of information. This information can only be viewed by a set equipped with a Teletext decoder.

Turbo Drive

VPS/PDC

With 'VPS' (Video Programming System) and 'PDC' (Program Delivery Control), the TV station controls the beginning and the length of the programmed recording. This means that your recording device switches itself on and off at the right time even if a TV program you have programmed begins earlier or finishes later than expected.

Automatic long play recording

Front A/V connectors

VIDEO Plus+

With the VIDEO Plus+ system, all you need to do to program your video recorder is to enter the 'Pluscode' – a single code of up to nine digits (but usually less) that is printed next to each TV program in most TV guides.

Record Link

When you want to record a programme from your satellite receiver or any other external device just activate the "Record Link", put the set in standby and programme the desired timer on your satellite receiver. Upon activation of the satellite receiver, the set will start the recording simultaneously.

One Touch Recording

Simply pressing the REC/OTR key will start a recording. If 'Direct Record'* is activated, the (DVD) Video Recorder will automatically look up the channel to which the TV set is tuned and record from the same channel.* available in Europe only.
